roads of the country? When this has been done, and when that good time comes (and it is as sure to come as tomorrow's sun is to rise), a weekly product of 250 then will our boys be willing to stay on cheese, such 100 pounds the farm and our daughters be willing to become farmers' wives. The isolation of farm life will then have passed The cheeses are seven away and instead of our boys and girls leaving the farm to go into the crowded cities more will be willing to go from cities to the farms. Then we will have free mail delivery and the telephone, and we will be the happy and contented people that the Almighty intended we should be when he gave us this rich and beautiful herit-

The Naming of Roads.

Grand Rapids Herald, is something that should have been attended to long ago. Every main road and every crossroad in the county ought to have its official title, just as do the streets and avenues in the city. The roads are all laid out on the map, but they are unnamed, and to attempt to address a farmer at his home residence except perhaps in the most general way is impossible. The board of supervisors might well appoint a committee or commission to name the roads in the county, and in selecting names it would be well to honor the sturdy ploneers who settled in the neighborhood through which the road passes. With the roads named a farmer could be as easily addressed by his-street and number as can those who dwell in cities.

Good Roads In the Philippines, If General Bell continues the good work he has begun, the Filipinos will soon have better roads than are usual in this country. During the past year under his direction fifty miles of macadamized road in one straight stretch have been constructed, connecting Calambas and Batangas, at a cost of about \$2,250 per mile in our money The farms within a mile of this road have doubled in value since its con-

GAVE UP BER POSITION.

Rather Than Make Up Booker T. Washington's Bed at an Indianapelis

Lula Spence, the chambermaid who refused to make up a room at the English hotel in Indianapolis, Ind., that had been occupied by Booker T. Washington, and who was discharged from the hotel, will go to Houston, Texas, to accept a position in a hotel, says the Atlanta Journal. She is still being deluged with complimentary letters from the South and offers of employment. Some of the letters have enclosed money, one check for \$10. In an interview with the Atlanta Journal correspondent she said:

"I have about made up my mind o go into the South and take the position at Houston. I regret very much the notoriety that has come out of my refusal to wait on a colored man. Great and small colored men are all the same to me. My people were slave owners in the South, and my grandfather was Joshua Morris, who was either a state or a United States judge in Alabama. I have no fault to find with Prof. Washington, and no doubt he is doing a great deal of good among his people, but I could not bring myself to clean up his room."

"Well what do you think about President Roosevelt receiving Washington at his table?"

"I would not have made up the bed after Roosevelt if he had been black. I think that was outrageous, and that as president, he should have been impeached."

Have you any political views?' "Very strong views. I am out and out Republican in everything from tariff to other questions in government. Strange as it may seem, too, my father was a union soldier, a member of the 18th Illinois, and I am proud of his part in freeing the negroes. He was born in the South, however, and so was my mother and they both were raised in the slave-owning class. Later they moved to Ann, Ill., my present home, and my father was a union volunteer from that place. My mother was born in Nashville, two squares east of the state house, and was raised at Florence, Ala. My father was a native of Kentucky. There is nothing more to say about the incident. I simply thankful to the friends in the South, and a few in the North, who have complimented me on my stand. I shall rest a week or ten The naming of the roads, says the days before I go to Houston to take the position that is offered me."

Raising Mules. "Twenty reasons why the farmer

should raise mules," is the title of a folder published by the Baker's Jack Farm of Lawrence, Kan. It is worth reproducing in full, as fol-

I. They can be raised cheaper

than any other stock. II. Will go into the market sooner than horses.

III. They are marketable any time from weaning time (four months old) until incapacitated by

IV. Are less liable to contract disease than the horse.

V. Pasture a number of colts through the grazing season and you will find plenty of blemishes at feeding time. Mules prove the contrary and have few, if any, blemishes, and their value is not decreased by blemishes, as a horse.

VI. They are easy to raise, easy sell and hard to blemish.

VII. They instinctly avoid holes and dangerous places. A team of runaway mules seem to run more for sport than fright, and usually stop before damage is done, while a horse never stops until he is completely freed.

VIII. The mule is more steady when at work than the horse, less nervous and is not so liable to become exhausted, and often beas to need no driver or lines.

IX. Can stand heat better than the horse, are steady and can be relied upon.

X. Can stand more abuse and hardship than a horse, but will respond as quickly as the horse to good feed and kind treatment.

W. Earle, Pickens and Dr. R. F.

XIX. As they will not breed they were created for a special purand lasting much longer.

The fortune of an extremely rich man is always an interesting subject of speculation, when it comes to considering the fortune of the richest man in the world, everybody is interested in it, probably more in a spirit of curiosity than anything else. It is usually the case that when a fortune passed \$1,000,000 it is apt to be magnified in the Lublic mind. One million dollars is a sum so enormous that it is difficult for the average mind to grasp its significance, hence, generally speaking, ten millions expressed in figures are no more impressive than one million. That is why so many millionaires, after death, are found to have left estates smaller than they were credited with possessing during life. It is probable that, in like man-

ner, the wealth of John D. Rocke-

feller has been estimated at too high a figure; still, the fact remains that by calculating from the size of the dividends he receives from the corporations in which he is interested it is possible to arrive at an approximately correct estiman closely associated with Mr. Rockefeller and said to be in a position to know, is quoted in the reunion a grand success.
